

ACKNOWLEDGEMENTS

It is with a sense of great satisfaction and pride that I am sitting down to pen out my Ph.D research thesis report. First and foremost we sincerely salute our esteemed Institution **University of Petroleum and Energy Studies, Dehradun, India** for giving this golden opportunity for fulfilling our warm dreams of becoming a Doctorate.

I, first and foremost, would like to express my deepest gratitude to my supervisor, **Dr. Ugur Guven** (Professor, Department of Aerospace Engineering) who had sown the seed of space applications into my mind and made me take this as the topic of research. He has been a source of inspiration and a monument of motivation to me throughout this work. Without him, this work would never have been completed. Secondly, my thanks are out to my co-supervisor **Dr. Pankaj Kumar Srivastava** (Associate Professor, Department of Petroleum Engineering & Earth Sciences), who stood with me throughout this tedious journey, for his invaluable contributions and suggestions where ever required. Dr. Pankaj Kumar Srivastava rightly understood the significance of this work and gave me time space to work amidst the busy academic and co-curricular departmental activities. I am thankful to **Dr. Kamal Bansal** (Professor & Dean, College of Engineering Studies) for the motivational and administrative support throughout.

My heartfelt thanks to **Prof. Utpal Ghosh** (CEO & President), **Dr. S. J. Chopra** (Chancellor), **Dr. Shrihari** (Vice-Chancellor), **Dr. Suresh Kumar** (Director, CoES), **Dr. Om Prakash** (Head, Aerospace Engineering), **Dr. Parag Diwan** (Vice Chancellor, Great Lakes University) for providing me the space and environment in this serene campus of University of Petroleum and Energy Studies, Dehradun, India to carry out this work. I should mention my gratitude to my friend **Mr. Pavan Kumar Nanduri** (Technical Manager, ARK Info solution Pvt. Ltd., Hyderabad) who is there with me throughout the journey especially when I had tough times, measuring it by word of thanks is not adequate/appropriate. Also, I thank my best student **Mr. Anirudh Katyal** (Associate Engineer, Rockwell Collins, Hyderabad), **Ms. Shagun Bishnoi** (B.Tech Aerospace (Avionics) Engineering Student, UPES) and **Mr. Hutanshu Kamal** (Program Manager, Mahindra Aerospace Pvt. Ltd., Bangalore) who supported me during the last leg of this

work. I am thankful to each and every faculty colleague of department of aerospace engineering for their support and cooperation.

What I am today is all because of my parents & family. My father, **Shri Prem Chandra Chaturvedi** (Sub-Inspector, Uttar Pradesh Police), Mother **Smt. Vindhyavasini Devi**, my sisters **Sangita, Pinky, Rekha and Neha** are thanked whole heartedly for their unwavering extended support throughout the tenure. A very special thanks to my Father-in-Law **Shri Dinesh Chandra Dobriyal** (Junior Assistant (Retd.), DG-Education, Govt. of Uttarakhand) and my Mother-in-Law **Smt. Rajeshwari Devi** for help and support provided at the crucial state of my health at the time of documentation process of this thesis.

If I don't mention these names then I would not be doing justice to myself and my work. Thanks is a very small word to express the cooperation and support provided by my better half, my wife, **Sonam Chaturvedi** who managed and took care of everything to provide me the time, space and peace of mind to finish off this tedious task. She took the total burden of our loving and beautiful kid **Anvi** from whom I have to keep myself forcefully away to continue the work. Thanks are due to all my friends and students who worked with me.

In the end, last but not the least, I would like to provide my special and humble obedience to the all the devotees of International Society for Krishna Consciousness (ISKCON). Extraordinary special thanks to **Lord Shri Krishna** who had given me the energy to compile and complete this wonderful task.

Sudhir Kumar Chaturvedi
