## List of Tables

1.1 Samples selected from each coastal villages of the study .................................................. 12

2.1 Studies related to determining factors in adoption of a new technology .......................... 34

3.1 Three different views of the stages of new technology adoption ................................. 43

3.2 Diffusion models and their application of a new technology ........................................ 44

3.3 Studies of diffusion models of ICTs and their application ............................................. 55

4.1 World marine fish production in ten years during 2005-2014 (in Million Tonne) ............ 58

4.2 Total fish production in India and the World, 2005-2015 (in Million Tonne) .................. 63

4.3 Fish production in India from 2004-05 to 2014-15 (‘000 tonne) ................................. 64

4.4 Contribution of fisheries sector at current price 2004-05 ............................................. 65

4.5 Marine fisheries resource of India ..................................................................................... 68

4.6 State-wise distribution of no. of fishermen population & its per cent to total population (in parenthesis) .................................................................................................................. 69

4.7 State-wise distribution of average family size of fisher population ............................. 70

4.8 State-wise occupational profile of fishermen in India ............................................... 71

4.9 State-wise distribution of educated fishermen as a percentage to total fishermen population .................................................................................................................................. 72

4.10 State-wise distribution of fishing crafts and gears during 2010 .................................. 73

4.11 Export trend of marine products in India during 2005-2015 ....................................... 75

4.12 Demographic features of Kerala during 2005 & 2010 ............................................... 76
4.13 Contribution of fisheries sector to GSDP of Kerala (at constant price 2004-05) (₹ in crores) ................................................................. 77
4.14 Contribution of fisheries sector to GSVA of Kerala [at base year 2011-12] (₹ in crores) ................................................................. 77
4.15 District wise Marine Fish Landings (MT) of Kerala during 2005-2015 . 78
4.16 District wise fishing crafts of Kerala during 2005-2010 ................. 80
4.17 Sector wise per capita Annual Catch Per Unit over the years .......... 81
4.18 Basic demographic features of nine coastal districts of Kerala in 2010 . 82
4.19 Districts wise active fishermen of Kerala during 2005 & 2010 ....... 83
4.20 Education status of fisher population in Kerala in 2010 ............... 83
4.21 Change in the education status over the years (1980-2010) ......... 84
4.22 Occupational structure of fisher population of Kerala (2010) ....... 85
4.23 Possession of land by the marine fisher households in Kerala, 2015 . . 86
4.24 Monthly income and expenditure of the marine households of Kerala . 87
4.25 Debt status of the marine households in Kerala (in %) ................. 87
4.26 Technological progress in Kerala marine fisheries sector ............. 95
4.27 Functions of ICT tools and their benefits in fishing and its related activities 102
4.28 Number of ICT tools in Kerala marine fisheries sector during 2005 and 2010 ................................................................. 108

5.1 Socio-economic status of the fishermen in the Northern study areas (n = 195) ................................................................. 121
5.2 Socio-economic status of the fishermen in the Central regions (n = 115) 126
5.3 Socio-economic status of the fishermen in the southern study areas (n = 190) ................................................................. 129
5.4 Degree of adoption of ICT tools in northern Kerala (rates of single day fishing crafts are in parenthesis) ......................... 133
5.5 Degree of adoption of ICT tools in the study areas of Central Kerala . . 138
5.6 Degree of adoption of ICT tool in Southern Kerala (parenthesis gives the rates of single day fishing crafts) ........................................ 142
5.7 Estimated results of Logistics growth function in Northern Kerala (n=195) 148
5.8 Estimated results of Logistics growth function in Central Kerala (n = 115) 150
5.9 Estimated results of Logistics growth function of Southern Kerala (n = 190) .......................................................... 151
5.10 Descriptive statistics of variables of PCA model (n = 500) .............. 154
5.11 Correlation matrix of each components of influencing factors of ICT tools’ adoption (n = 500) ......................................................... 155
5.12 Eigenvalues and cumulative percentage of variance of PCA ............ 157
5.13 Factor loading and communalities based on Principal Component Analysis with oblimin rotation for 9 factors influencing adoption of ICT tools (n=500) ........................................................... 160
5.14 Crosstabs values of socio-economic factors and craft features with number of adopted ICT tools in three regions (n=500) ................. 162
5.15 Crosstab classification of socio-economic features and ICT tools in Kerala (n=500) ............................................................... 164
5.16 Pearson chi-square values of socio-economic, crafts features with the reference category of ICT tools in Kerala (n=500) ............... 164
5.17 Overall model evaluation of binomial logistic regression function .... 167
5.18 Logistic regression analysis of socio-economic factors (n = 500) of users and non-users of advanced ICT tools ............................... 168
5.19 Economic performance indicators of the motorised boats in Northern Kerala (n = 195) .......................................................... 171
5.20 Economic performance indicators of motorised crafts in Central Kerala (n = 115) ................................................................. 171
5.21 Economic performance indicators of motorised crafts in Southern Kerala (n = 190) ............................................................... 172
