ACKNOWLEDGEMENTS

Finally the day has come to look around and think about all those people who were a source of support and inspiration for me during this testing phase of my life. Words usually fall short when it comes to showing for deeds of similar nature.

But, first and foremost, I would like to thank God, for endowing me with perseverance, courage and the ability to carry out this work. Without his blessings, this piece of work would not have seen the light of day.

Speaking of God, what else can come to one’s mind than the living personification of the Almighty himself.....MY PARENTS. Thank you mummy papa for all the contribution that you have invested in me!!! No words can give justice to how I feel about you both. Your undying faith in me has led me here. I am truly blessed. I find it hard to verbalize my deepest sense of indebtedness to my dear family for their constant support, blessings and love that kept encouraging me and led to accomplishment of this venture. Thank you for being so incredible.

At this moment of accomplishment, I would like to extend deep gratitude to my esteemed supervisors Prof. Neelima R. Kumar Department of Zoology and Dr. Jaspreet kaur Dept of Biotechnology (UIET), Panjab University, Chandigarh, for sharing their knowledge and professional support during my studies. I have been extremely lucky to have supervisors like them who cared for my work and me by responding to every question, queries, and problems so promptly. Their positive outlook and confidence not only inspired me, but also gave the privilege and honor to share their exceptional scientific knowledge and above all their extraordinary human qualities. They are both wise and humble, enthusiastic and patient, serious and cheerful, mentor and an inspiration, gentle and kind. When I look back, it is perplexing how my supervisors managed to supervise, advice, motivate and encourage every bit of me towards each possibility of life with a smile guiding me towards the correct path.

I would like to express my warm regards to Prof. Sukhbir Kaur, Chairperson, Dept of Zoology Panjab University, Chandigarh for providing me with the necessary research facilities. I would also like to express my profound regards to the entire
teaching faculty of the department for the help rendered whenever it was required.

I also acknowledge the help of the technical and the non-teaching staff, Department of Zoology, provided throughout the course of this study.

The contribution of a lively lab atmosphere is indispensable in this endeavour and for making this journey a joyous and memorable one, all of my colleagues and Lab mates Bulbul Gupta, Aditi Sharma, Dr. Umesh Bharti, Sangeeta, Dr. Preeti Kalia, Dr. Ruchika Mandla, Dr. Jamuna Negi, Dr. Priyanka Chandel, Dr. Anudeep Kaur, Dr. Rajinder Kaur, Dr. Rajeev Kumar and Dr. Shivani Singla deserve heartfelt thanks for their very warm behaviour. A special thanks to Bulbul Gupta for her never-ending help and above all the beautiful friendship we share.

“Family isn’t always blood. It’s the people in your life who want you in theirs; the one who accept you for what you are. The ones who would do anything to see you smile and love you no matter what. Thank you so much the best buddy of my life Gaurav Rana for being the perfect person! You have always been with me in my highs and lows, helped me through and made me laugh when I did not even want to smile. You will always hold a very special place in my heart forever.

Last but not least I express my gratitude towards those creatures who sacrificed their life for the present work.

I acknowledge the University Grant Commission (UGC-CAS-II) for providing me the necessary funding and fellowship to pursue research.

Date Anita Devi
