

Acknowledgement

This Thesis is the end of my journey in obtaining my Ph.D. I have not traveled in a vacuum in this journey. This Thesis has been kept on track and been seen through to completion with the support and encouragement of numerous people. To express gratitude and obligation in words is not easy. Today When I look back, my heart is filled with intense feelings. First and foremost I wish to Thank God Shri Shirdi Sai Baba Almighty for bestowing me with the qualities of hard work, sincerity, perfection and perseverance, which has helped me to complete this work successfully.

Compiling this thesis has been difficult enterprise .Today on completion of this work, I felt a deep sense of commitment to express my sincere gratitude to all those who were involved directly or indirectly in achieving this success. In all my humanity I shall only say that I shall never be able to repay this debt.

I extend my deepest gratitude to my respected guide Dr. Sanjay Vyas Prof. of Botany, Govt. Holkar Science College, Indore for his kind supervision. He has always provided me with moral and academic support. His esteemed suggestion and critical analysis at every juncture has helped to give this study its final configuration. Also many thanks to Prof. A.B. Seerwani, his words and regular guidance made me appear this task easy going and meaningful. I shall be indebted to him life long for cultivating in me the art of self-criticism and precision oriented scientific research. His guidance, valuable suggestions and constant encouragement made this work successful.

Undertaking this work was challenging and tough. But the grace of God, blessings of my parents, elders, co-operation, dedication, devotion and understanding of my husband, love and warmth of my children and support of my relatives and friends have made this dream come true.

I am grateful to Prof. B.S Arya, my favorite teacher and Dr. V.B Deewanji for inspiration, encouragement and valuable guidance with strong moral support.

I am thankful to Dr. S. L. Garg, Principal Holkar Science College Indore, Dr. Sanjida Iqbal, Head Department of Botany, Holkar Science College Indore who had been extremely helping throughout this work by providing research and library facilities.

I am also thankful to Dr. Narendra Dhakad, Additional Director, Department of Higher Education, Indore; Prof. R. S. Maheshwari, Dr. M. M. P. Shrivastav, Dr. Pradeep Sharma, Govt. Holkar Science College Indore, who had been extremely helping throughout this work.

I gratefully acknowledge Dr. Geeta Neema, Reader in IIPS, DAVV, Indore for assistance in statistical analysis and valuable suggestions.

I express my sincere thanks to Dr. Dilip Waghela, Pollution Control Board, Indore (M.P.), and Dr. P.N Chowdhary, owner of National Centre for Fungal Taxonomy (NCFT) New Delhi.

I owe a great deal of appreciation and gratitude to Dr. Kamala Shivani, Dr. Smriti Chitnis and Dr. Angurbala Bafna and Dr. Monica Jain for every kind of support, help and guidance.

I am thankful to all my colleagues of Botany Department and other staff members of Holkar Science College specially to Mr. Vivek Akhand

for Computer assistance and Mr. Prakash Mavate for rendering their support and help.

My very special thanks to Mrs. Veena Vyas for her kind behavior and support which helped me to complete my work with pleasure.

Last but not least, I would like to pay high regards to my Husband Mr. Sunil Vivrekar, without his unforgettable cooperation, support, and devotion I could not have achieved this landmark.

I heartily appreciate my son Mr. Swapnil Vivrekar, daughter Dr. Snehal Vivrekar, daughter-in-law Mrs. Megha Vivrekar and son-in-law Dr. Amol Ghaisas for their sincere encouragement and inspiration throughout my research work and lifting me uphill at this phase of life. I owe everything to them. Besides this, several people have knowingly and unknowingly helped me in the successful completion of this project.

My beloved grandson Atharva Vivrekar's love has been my biggest motivation.
