Acknowledgement

“Our greatest glory is not in never failing but in rising each and every time we fail”

-Confucius

Now the time has come when I convey my heartfelt thanks in black and white to all those peoples who have been associated for short or long period with me during my Ph.D. tenure and provide me every kind of support in carrying out this project. I confess at this point that being the sole author but by no means, I am the sole contributor of the contents of this thesis and it would have not been taken the present shape without the direct or indirect contributions of the peoples associated with me in the lab and also in my life.

When it comes to thanks first, no one can take the position of Dr. J.P. Mishra (Head, Department of Chemistry, F.G. College, Raebareli) my guide, supervisor, mentor or teacher whatever you call him but definitely he has been much more than that for his students always. This is the opportunity, I would like to express my sincere and profound gratitude towards him and feel privileged to be associated with such a great personality. His virtues of excellent scientific temperament, meticulous planning, strong communication power, professional skills, down to earth, ever learning and caring attitude towards his students impressed me greatly. He always has time to listen to all sorts of problems discuss experimental failure (sometime crucial), giving suggestions and even help me during the work on the bench. His constructive criticism and vital comments have helped me to improve me both academically and personally. I have learned a lot from him and once again thank him for his immense patience and faith that he shown in making me each and every aspects of research life.

I extends my thanks to Dr. A.K. Saxena (Deputy Director, Central Drug Research Institute, Lucknow) who interest me in this domain of theoretical drug design; through QSAR method, trained me in the ground work and managed to disseminate his inquisitive spirit, so successful that despite paucity of means and materials. I am also thankful to Dr. Pradeep Srivastava (Chem. Tech. Department, C.D.R.I. Lucknow) and Dr. S.N. Pandey (Ex. Professor, Department of Pharmaceutics, B.H.U., Varanasi) and Dr. Rahul Mishra (Bhabha Atomic Research Institute, Mumbai) for his precious guidance, inspiration and keen interest with constant encouragement during this work.
I am also thankful to Dr. Rmashankar Roy (Principal, F.G.College, Raebareli) for providing me an infrastructure and necessary facilities, where I could work smoothly and consistently. I wish to my deep sense of gratitude and respect to Dr. A. K. Ramrakhyani, Dr. Sheila Srivastava, Dr. S. S. Mishra, Dr. R. P. Singh, Dr. Abha Tripathi, Dr. Sefali Srivastava, Dr. Alka Singh, Dr. Geeta Pandey, and Dr. Sarika Bajpai of Chemistry Department, F.G.College, Raebareli for their willingness, corporation and mental support in all the possible way to achieve my goal.

I would like to thanks Pushpanjali Singh, Saloni Mishra, Supriya Singh and Preeti Tiwari, my colleague and friends with whom I got a chance to interact within the lab. The light moments shared with them will always be there in my memory. I wish a special thank to Tanvee Tripathi for her helping and cordial behavior throughout my work. She always extended her hands of support required for my research work in the lab as well as doing the things, for which I needed additional help. I discussed all my success and failure with her and she always were ready with their prompt solutions. I truly appreciate the concern of lab staff Sri Ram Singh, Rajendra Prasad Singh and C.P.Srivastava. It would be incomplete if I do not mention their extra pain taking efforts for arranging each and every facility in the lab at the earliest possible for their students to work comfortably and smoothly.

It is, in fact, of delightfulness to express my sincere obligations to my friends. I would have not reached to this stage without the support of Anurag Sinha (My Lucky Mascot) who did everything for me to achieve my goals. I would also like to emphasize that Mr. Purnendu Mishra is the person who has sown the seeds of self confidence in me and always stand with me as a torch bearer. I also express my sincere obligations and graceful regards to my friends Dr. Nishant Singh (Resident Doctor, King George Medical College, Lucknow), Dr. Surendra Pratap Singh, Dr. Dhananjay Singh and Dr. Paritosh Singh for his invaluable suggestions and tips for my work.

This is the only opportunity to express my love, thanks and regards to my Grandparents and other family members R.C.Trivedi, Dr.D.S.Trivedi, S.S.Trivedi, Puneet Trivedi ‘Big B’, Pratima Bhabhi, Indu ‘D’, Ajay Awasthi and Rupika Tripathi. They all have supported by every means and believed in me always. ‘Mritunjay’, ‘Harshit’ and ‘Prakhar’ three kids in my family, playing with them always lifted my spirit during gloomy phases. Their pranky activities and endless naughtiness (though cute) is lifeline for me.
To top it all I have no words to thanks my ‘Mom’, whose unconditional love, support and full confidence in me, helped me to grow up and understand the things in better way. I believed that ‘God’ cannot be everywhere so ‘He’ made ‘Maa’ and so is my ‘Mom’. I thank my father Sri. Awadhesh Chandra Trivedi, another person in my life who silently supported, admired and believed in all my decisions throughout my life. A lot of special thanks to all those peoples in my life who are anonymous here but definitely have been part of my learning throughout.

And in the end I would like to give a biggest thanks to ‘God’ who sent all these amazing persons in my life and made my life so beautiful. It is ‘His’ blessing that I have completed this task successfully.

Vineet Kumar Trivedi
