

# *Outline of Thesis*

## **5. OUTLINE OF THESIS**

The present study has 3 broad objectives as stated in Chapter 4. It was conducted into 3 phases in order to study each objective individually. The methodology, results, discussion, summary and conclusion of each study objective have been discussed separately under Chapter 6, Chapter 7, and Chapter 8 respectively.

Chapter 6 comprises of Phase I study which was conducted to assess the awareness among HCPs on pharmacovigilance, ADR reporting, extent of ADR reporting, and strategies devised to promote awareness among HCPs on pharmacovigilance.

Chapter 7 comprises of Phase II study which was conducted to assess the awareness among consumers/patients regarding pharmacovigilance and strategies devised to promote direct patient reporting.

Chapter 8 comprises of Phase III study which was conducted to monitor and analyze ADRs in patients undergoing haemodialysis.
