

List of Tables in Phase-1 Study:

Table-1. Random blood glucose & body weight of rats in different groups.

Table- 2. Tissue weights, blood parameters & parameters of tissue homogenate in Normal control (NC) and Diabetic control (DC).

Table-3. Tissue weights, blood parameters & parameters of tissue homogenate in DC, DM+TT150 and DM+TT300

Table -4: Tissue weights, blood parameters & parameters of tissue homogenate in NC, ND+TT150 and ND+TT300

Table- 5: Tissue weights, blood parameters and parameters of tissue homogenates in DC, DM+PM250 & DM+PM500

Table -6: Tissue weights, blood & tissue homogenate parameters of NC, ND+PM250 & ND+PM500

Table- 7: Tissue weights, blood & tissue homogenate parameters in DC and DM+Glibenclamide

Table- 8: Tissue weights, blood & tissue homogenate parameters in DM+Glibenclamide, DM+TT150 and DM+TT300.

Table- 9: Tissue weights, blood & tissue homogenate parameters in DM+Glibenclamide, DM+PM250 and DM+PM500

Table- 10: Tissue weights, blood & tissue homogenate parameters in DM+TT150 and DM+PM250

Table- 11: Tissue weights, blood & tissue homogenate parameters in DM+TT300 and DM+PM500

Table- 12: Escape latencies comparison between various groups

Table- 13: Total phenolic content in *P.marsupium* & *T.terrestris*

Table-14: α - glucosidase inhibitory action of both plant extracts

List of Tables in Phase-2 study:

Table-1: Tissue weights, blood parameters & parameters of tissue homogenate between NC and DC.

Table-2: Tissue weights, blood parameters & parameters of tissue homogenate in DC, DM+TT150 and DM+PM250

Table- 3: Tissue weights, blood & tissue homogenate parameters in DC, DM+Glib, DMGlib+TT150 and DMGlib+PM250

Table- 4: Tissue weights, blood & tissue homogenate parameters in DM+TT150 and DMGlib+TT150

Table-5: Tissue weights, blood & tissue homogenate parameters in DM+PM250 and DMGlib+PM250

Table- 6: Tissue weights, blood & tissue homogenate parameters comparison between DM+Glibenclamide and DMGlib+TT150, DMGlib+PM250
