

TABLE OF CONTENTS

Chapter No	Contents	Page No
1	Introduction	1-12
	1.1 Statement of Problem	10
	1.2 Aim of the Study	11
	1.3 Objectives of the Study	11
	1.4 Research Hypothesis	12
2	Review of Literature	13-73
	Introduction	13
	2.1 Stroke Epidemiology	14
	2.2 ICF in Stroke Rehabilitation	15
	2.3 Balance and Postural Control impairments following Stroke	16
	2.4 Mobility related impairments following Stroke	18
	2.5 Muscle Strength and Stroke	20
	2.6 Quality of Life after Stroke	21
	2.7 Factors influencing motor recovery, neuroplasticity and motor learning in stroke rehabilitation	22
	2.8 Task Specific Training (TST)	27
	2.8.1 Literature review	28
	2.8.2 Search Outcome	30
	2.8.3 Summary	38
	2.9 Current challenge in Neurorehabilitation - Recovery or Compensation	39

	2.10 Motor Imagery Training as priming method for stroke recovery	40
	2.11 Imagery	41
	2.11.1 Motor Imagery (MI)	41
	2.11.2 Types	42
	2.11.3 Mental Practice (MP)	42
	2.11.4 Theories of Mental Practice	42
	2.11.5 Principles Underlying Motor Imagery Training(MIT) in Clinical Practice	44
	2.11.6 Motor Imagery Training (Mental Practice) in Clinical Applications	45
	2.11.7 Mental Practice in Neurorehabilitation	45
	2.11.8 Practical Framework Model for Mental Practice in Stroke Rehabilitation	46
	2.11.9 Motor Imagery Training to address Lower Extremity Recovery in Stroke Rehabilitation	49
	2.11.10 Literature Review	49
	2.11.11 Search Outcome	52
	2.11.12 Summary	61
	2.12 Outcome Measures (OMs)	62
	2.12.1 Functional Gait assessment (FGA)	64
	2.12.2 Berg Balance Scale (BBS)	64

	2.12.3 Isometric Muscle Strength Using Hand Held Dynamometer	65
	2.12.4 10-meter walk test (10MWT)	65
	2.12.5 Stroke Impact Scale-16 (SIS-16)	66
	2.13 Summary and Literature Gap	71
3	Methodology	74-129
	3.1 Study Design	74
	3.2 Study Setting	74
	3.3 Study Duration	74
	3.4 Study Participants	74
	3.5 Sampling Method	74
	3.6 Sample Size	75
	3.7 Randomization and Allocation Concealment	75
	3.8 Block Randomization	76
	3.9 Inclusion Criteria	76
	3.10 Exclusion Criteria	77
	3.11 Tester	78
	3.12 Procedure	78
	3.13 Interventions	79
	3.14 Physical Practice Group	82
	3.14.1 General Guidelines for the Delivered TST Program	83
	3.14.2 Prescription of the exercise training in Physical Practice Group	85

	3.14.3 FITT Components addressed in TST regime	104
	3.14.4 Compliance	104
	3.15 Physical plus Mental Practice Group	105
	3.15.1 Steps involved in Mental Practice Framework	105
	3.15.2 Content of Delivered Motor Imagery Training	119
	3.15.3 Perspective Imagery	120
	3.15.4 Adherence	120
	3.15.5 Dosage	120
	3.15.6 Feasibility	122
	3.16 Follow up	122
	3.17 Outcome Measures	122
	3.17.1 Primary Outcome Measure	123
	3.18 Secondary Outcome Measures	123
	3.18.1 Berg Balance Scale	123
	3.18.2 Isometric Muscle Strength	123
	3.18.3 10-meter walk test	128
	3.18.4 Stroke Impact Scale 16	129
4	Data Analysis	130-131
5	Results	132-157
	5.1 Participants Flow	132

	5.2 Demographics Characteristics of Study Participants	134
	5.2.1 Baseline Clinical status related to Stroke recovery and Motor Imagery abilities	136
	5.3 Baseline Comparison of Outcome Measures	138
	5.4 Distribution of Lower Extremity Muscle Strength	139
	5.5 Summary Scores for all the Outcome Measures with Test Statistics	140
	5.6 Interpretation of Functional Gait Assessment (FGA) for both the Groups	144
	5.7 Interpretation of Berg Balance Scale (BBS) Score for both Groups	146
	5.8 Interpretation of Isometric Muscle Strength in Newtons (N) for both Groups	148
	5.9 Interpretation of 10MWT scores for both Groups	153
	5.10 Interpretation of SIS 16 scores for both Groups	156
6	Discussion	158-179
7	Conclusion	180-183
	References	184-214
	Annexures	215-250
	Conference Presentations	
	Publications
