

LIST OF TABLES

Table No	Table Title	Page No
2.1	Pitts and Fosner stages of Motor Learning	25-26
2.2	Summary of the Methodological Parameters for MIT Related to Stroke Rehabilitation	47-48
2.3	Summary of Psychometric properties of Outcome measures	67-70
3.1	Overview of treatment framework delivered for both the groups	80-81
3.2	Task specific training focused sit to stand and the methods of progression	86-87
3.3	Task specific training focused to standing and the methods of progression	88-89
3.4	Task specific training focused to walking and the methods of progression	90-91
3.5	Task specific training focused to stair climbing and the methods of progression	92
3.6	Summary of muscle strength testing procedures using Hand Held Dynamometer	126
5.1	Baseline Demographic Characteristics	135
5.2	Baseline clinical status for stroke recovery and motor imagery ability	137
5.3	Comparison of baseline outcome measures	138
5.4	Distribution of lower extremity muscle strength in Newton (N) and percentage difference compared with strong side	139

5.5	Summary scores for FGA, BBS, SIS 16 with Friedman's test statistics	141
5.6	Summary scores for 10MWT, Muscle strength with Repeated Measure of ANOVA test statistics	142
5.7	Comparison of Median difference (IQR) in FGA score for within and between groups across time measurements	145
5.8	Comparison of Median difference (IQR) in BBS score for within and between groups across time measurements	147
5.9	Comparison of difference in Mean (SD) for paretic lower extremity isometric muscle strength in the physical practice and physical plus mental practice groups across time measurements	149-150
5.10	Comparison of difference in Mean (SEM) for lower extremity isometric muscle strength across time between the groups	152-153
5.11	Comparison of difference in Mean (SD) score of Gait speed across time measurement within the groups	154
5.12	Comparison of Mean (SEM) score of Gait speed across time measurement between groups	155
5.13	Comparison of Median difference (IQR) in SIS-16 score for within and between groups across time measurements	157
