ACKNOWLEDGEMENTS

ABSTRACT

CHAPTER 1

Oral cancer: a preview 1

CHAPTER 2

DNA Repair: a preview 24

CHAPTER 3

Overall research design and justification 45

CHAPTER 4

Role of XRCC1 in BER pathway and genetic susceptibility to oral cancer 50

CHAPTER 5

XPD/ERCC2, ERCC1 and ERCC4/XPF genes in the nucleotide excision repair (NER) pathway 75

CHAPTER 6

Function of XRCC3 in Homologous Recombination Repair pathway and oral cancer susceptibility 104

CHAPTER 7

Genetic predisposition to DNA damage and its effects on genetic susceptibility to oral cancer 122

CHAPTER 8

DNA Repair Capacity (DRC) and its role as a phenotypic marker for oral cancer 150

CHAPTER 9

**Genetic polymorphisms and tumor response
to radiation therapy in oral cancer** 173

CONCLUSIONS 189
