ACKNOWLEDGEMENT

Since a long time, women have been treated as the subordinated sex and patriarchal social system has prominently influenced their way of life. Women have to confront with various traumatic situations in their family as well as in the society, due to patriarchal unjust social system which expects docility and submissive behavior from women.

Feminist thinkers, writers and intellectuals all over the world seek to break this prevailing system by their writing and rebel against this suffocating patriarchal strategy to keep women at lower strata of society. Feminism has been generally defined as a concept that can encompass both an ideology and movement for Socio-political change based on a critical analysis of male privilege and women’s subordination within any given society. Thus, we can say that feminism opposes women’s subordination to men in the family and society. Modern feminist thought seeks to destroy male hierarchy as they struggle to wipe out the sexual
dualism. This liberal feminism is necessarily pro-women but of course not anti-man.
