Acknowledgement

First and foremost, I would like to thank my research director Dr. M. Shashi, Professor and Head, Department of Computer Science and Systems Engineering, A.U. College of Engineering, Andhra University for her guidance and encouragement throughout the period. I express my gratitude for her invaluable support and patience in completing this research work. This thesis would not have shaped to this form without her cooperation.

I thank Dr. M. Prasad Babu, Chairman, Board of Studies and the members of DRC, Department of Computer Science and Systems Engineering, A.U. College of Engineering, Andhra University for their valuable suggestions. I thank Dr. G.S.N.Raju, the principal, A.U. College of Engineering, Andhra University for giving me the opportunity of doing this research work.

I am extremely indebted to the management, R.V.R & J.C. College of Engineering, Guntur for their consistent support and encouragement and for providing me the necessary resources to accomplish my research work. I thank Dr. A. Sudhakar, the principal, R.V.R & J.C. College of Engineering, Guntur for his help and support and for permitting me to use the required resources.

I thank the students and the staff of Dept. of Computer Science and Engineering, R.V.R. & J.C. College of Engineering, Guntur for helping me in conducting the user study in the lab and for participating in the user study which is an essential requirement for my research work. I especially thank M. Roop Teja, Y. Krishna Chaitanya and I. Raja Shekar for their help in completing the task.

Finally, I thank all my family members, my greatest strength for supporting me throughout the period taking the pains and for making me comfortable in completing the research work.

M. Sreelatha
