Acknowledgements

The endless thanks go to Lord Almighty for all the blessings he has showered onto me, which has enabled me to write this last note in my research work. During the period of my research, as in the rest of my life, I have been blessed by Almighty with some extraordinary people who have spun a web of support around me. Words can never be enough in expressing how grateful I am to those incredible people in my life who made this thesis possible. I would like to thank them for making my time during my research in the University a period I will treasure.

At this moment of accomplishment I express my heart-felt gratitude to my research supervisor, Dr. Shelja K. Juneja, Associate Professor and Head, Dept. of Environmental Science, The IIS University, Jaipur, for always being so kind, helpful and motivating. She has taught me another aspect of life, that, “goodness can never be defied and good human beings can never be denied”. She has always been there for me with her motherly hand whenever I needed it the most. Her constant guidance, cooperation and support have always kept me going ahead. Unless her thorough supervision, the work would have not taken shape. I owe a lot of gratitude to her for always being there for me and I feel privileged to be associated with a person like her during my life.

I pay homage to my co-supervisor Prof. R.K. Behl, Director (New Initiatives), Manav Institute, Jevra, Hisar. Each meeting with him added invaluable aspects to the implementation and broadened my perspective. He has guided me with his invaluable suggestions, lightened up the way in my darkest times and encouraged me a lot in the academic life. From him I have learned to think critically, to select problems, to solve them and to present their solutions. His drive for scientific excellence has pushed me to aspire for the same. I specially thank him for his critical assessment and careful scrutiny of the manuscript. It was a great opportunity for me to have a chance of working with him.
I sincerely thank Prof. Pradeep Bhatnagar, Dean, Dept. of Life Sciences, The IIS University, Jaipur who has always made himself available to clarify my doubts. I really appreciate the feedback offered by him.

I am grateful to Ms. Dinisha Abhishek of CCSHAU, Hisar for her technical assistance.

My heartfelt thanks to the Lab staff of the Manav Institute, Jevra, Hisar and The IIS University, Jaipur for providing me with the required assistance to carry out the work.

My special and sincere thanks are also to Dr. Ashok Gupta, Vice – Chancellor, Dr. Rakhi Gupta, Rector and Registrar and Prof. K.S. Sharma, Advisor, The IIS University, Jaipur for providing all the necessary facilities during the research work.

I would like to acknowledge the people, who mean world to me, my parents who gave me liberty to choose what I desired. Thank you mom and dad, you are my greatest strength and I am blessed to be your daughter. I extend my respect to my parents-in-law who supported me in every possible way. I also would like to thank my beloved sister Deeksha for being a good friend and understanding me well in various situations. A special thanks to my younger brother Vishal for his help, love and affection.

Warmest thanks to my husband, Yugant Sharma for his understanding and patience. He has supported me in each and every way, believed in me and inspired me in all dimensions of life.

All of you made it possible for me to reach this last stage of my endeavour. Thank You from my heart-of-hearts.

NUPUR SOBITI
