

Acknowledgement

At the beginning itself I should admit that words are not enough to express my gratitude and indebtedness to my supervisors D Narayana and Achin Chakraborty. It is their continuous encouragement and extraordinary patience in going through the chapters several times, which made me complete the work in stipulated time. I am also grateful to Chandan Mukherjee whose involvement in my work was no lesser than a supervisor, although he was not my supervisor in the formal sense.

Praveena Kodoth, P Shaheena and U S Mishra were kind enough to go through the draft of different chapters and offered valuable suggestions. Among my friends, Alice, Diana, Nadhanial, Nandana, Rakhe, Subu, Sudeep and Tannistha meticulously went through different chapters and offered editorial suggestions. I am grateful to all of them. George happily took care of the difficult and boring job of formatting the dissertation and taking printout. I am very grateful to George and Priya for their warm friendship and hospitality.

While writing the dissertation I have benefited greatly from discussions with various people both inside and outside CDS. In CDS I greatly benefited from the discussions with Indrani Chakraborty, K P Kannan, K Navaneetham, M Kabeer and Pradeep Kumar Panda. In particular, I would like to thank A K Varma (Deputy Director, NSSO), Gukul Chandra Biswas (Librarian-in-charge, NSSO) and A K Mukherjee (Director, State Bureau of Health Intelligence, Government of West Bengal) for their cooperation. In the process of getting familiar with NSS data, I was immensely benefited by the guidance of Dipankar Coondoo (ISI Kolkata), Jasim Pias (ISI Kolkata), Kevin Crow and Xiao Chen (both from Stata Technical Support Group).

I was also fortunate enough to get good friends like Aravindan, Jaku, Joseph, and Sejuti. Apart from being very good friends, Gaurav and Rudra through their natural sense of humour and passion for delicious food added many colours to my campus life.
