Chapter	Title	Page No
1	Introduction	1-16
	1.1 The Problem	1
	1.2 Objectives	4
	1.3 Methodology	5
	1.4. Why Studying a Single State - West Bengal?	9
	1.5 Chapters and Important Findings	10
	1.6 Limitations of the Study	13
	Appendix	15
2	Demand for Health Care: Theories and Evidence	17-34
	2.1 Theoretical Development	17
	2.2 Review of Empirical Findings	21
	2.2.1 User fees or Price	21
	2.2.2 Income	22
	2.2.3 Distance Cost or Time Cost	23
	2.2.4 Quality	24
	2.3 A Few Critical Notes	27
	2.3.1 Ambiguous distinction between Quality and Price	27
	2.3.2 No Distinction between Outpatient and Inpatient Care	28
	2.3.3. Effects of Model	29
	2.3.4 Proxies for Variables and Quality of Data	29
	2.3.5 Questioning the Inferences	30
	2.4. Summing Up	31
	Appendix	33
3	Concepts and Measurement of Quality of Health Care	35-62
	3.1 Quality of Care: A Critical Review of Literature	35
	3.1.1 Why Quality Measurement	35
	3.1.2 Economists View of Quality	36

	3.1.3. Public Health View of Quality	37
	3.1.4 Donabedian's Approach	37
	3.1.5 Institute of Medicine's Approach	39
	3.1.6 Other Approaches	40
	3.1.7 Empirical Measurement of Quality	42
	3.1.8 A Few Critical Notes	45
	3.1.9 Major Lessons Drawn	51
	3.2 Quality of Health Care: An Alternative Approach	51
	3.2.1 Definition of Quality	52
	3.2.2 Technical and Functional Quality	53
	3.2.3 Quality as a Relative Concept	55
	3.2.4 Trans-positional Assessment	56
	3.3 Price of Health Care	59
	3.3.1 Distinguishing Price from Quality	59
	3.3.2 Direct Price and Access Cost	60
	3.3.3 Access as a Relative Concept	61
	3.4 Summing Up	61
4	Demand for Health Care: Modified Model and Theoretical Results	63-80
	4.1 GLS 87: The Structural Model and Modifications	63
	4.2 The Structural Model and Extension	66
	4.3 Some Theoretical Results	70
	4.4 Theoretical Model: Some Further Implications	74
	4.5 Highlighting the Main Inferences	79
5	Data on Morbidity and Utilisation of Health Care: A Review of NSS 52nd Round and NFHS 2 Data	81-112
	5.1 NSSO Health Surveys	81
	5.2 NSS 52 nd Round	85
	5.2.1 Coverage and Sampling	86
	5.2.2 PSU and Household -level Information	88
	5.2.3 Quality of Data by Informant	89

5.2.4 Household-level Information	90
5.2.5 Morbidity Data	90
5.2.6 Details of Utilisation	94
5.2.7 Cost of Illness and Health Care, and Sources of Finance	96
5.2.8 Truncation of Data due to Fixed Reference Period	98
5.2.9 Bias and Precision of Estimates	99
5.2.10 Non-Sampling and Sampling Errors	99
5.3 NFHS 2	101
5.3.1 Coverage and Sampling	101
5.3.2 Village-Level Information	102
5.3.3 Household-level Information	102
5.3.4 Women-level Information on Utilisation and Quality of Health Care	104
5.4 Some General Limitations of Survey Data	105
5.5 Summing Up	106
Appendix	107
6 Access Cost, Quality and Choice of Outpatient Care	113-145
6.1 Defining Population Sub-groups	113
6.1.1 NSS 52 nd Round	113
6.1.2 NFHS 2	117
6.2 Reported Prevalence of Illness: Exploring the Pattern	117
6.3 Choice between Health Care and No Care	119
6.3.1 Exploring the Choice Pattern	120
6.3.2 Understanding the Choice Pattern	122
6.4 Choice between Health Care Providers	126
6.4.1 Choice between Government and Non-government	126
6.4.2 Role of Monetary Cost in Choice	127
6.4.3 Role of Non-monetary Access Cost and Quality in Choice	128
6.5 Choice of Health Care: A Multinomial Logit Analysis	133
6.6 Women's Responses to Quality: Evidence from NFHS 2	137

	6.7 Summing Up	141
	Appendix	143
7	Direct Price, Access Cost and Choice of Inpatient Care	146-180
	7.1 Utilisation of Inpatient Care: Understanding the Pattern	146
	7.1.1 Role of Illness and Age in Utilisation	149
	7.1.2 Role of Monetary Access Cost in Utilisation	152
	7.1.3 Role of Non-monetary Access Cost in Utilisation	153
	7.2 Choice of Inpatient Care Facilities	156
	7.2.1 Choice of Facilities: Exploring the Pattern	157
	7.2.2 Role of Monetary Cost in Choice	159
	7.2.3 Role of Quality in Choice	161
	7.3 Distance, Communication Facilities and Utilisation of Inpatient Care	162
	7.4 Access to and Utilisation of Inpatient Care: A Spatial Analysis	164
	7.4.1 Indicators of Access: Advantages and Limitations	164
	7.4.2 Inter-district Variation in Access	165
	7.4.3 Access and Utilisation: Exploring the Association	167
	7.5 Rate of Utilisation of Inpatient Care: Re-estimation	170
	7.6 Summing Up	176
	Appendix	177
8	Conclusion and Policy Implications	181-189
	Bibliography	190-208
