Acknowledgement

“In everyone's life, at some time, the inner fire goes out. It then bursts into flame by an encounter with another human being. We should all be thankful for those people who rekindle the inner spirit.”

*Albert Schweitzer*

For me, acknowledgement is not just a customary piece of writing. It rather represents my thoughts steering their way from my heart to this paper. There are a lot of persons who have stood by me through all thick and thin during the period of my research. At this juncture, I wish to acknowledge them for putting in commendable efforts for the accomplishment of my thesis work.

I wish to extend my heartfelt gratitude towards Dr. Punam Bedi and Dr. Hema Banati, my thesis supervisors at the Department of Computer Science, University of Delhi. I cherished working as a research scholar under their able supervision.

Dr. Bedi gives her students a conducive and research-friendly platform for bringing out constructive and thought-provoking ideas. She has been a strong pillar of support in all my endeavors and provided extremely valuable academic, technical and administrative guidance throughout the period of my work. Her observant attitude helped me take heed of my mistakes and taught me to take deadline pressures with ease.

Dr. Banati has been a continuous source of motivation to me. She provided me with the direction essential to chalk out my research objectives and offered invaluable critique on my work. She bestowed me numerous innovative ideas that helped me delve deeper into my research and realize my research goals. Her friendly disposition let me reach out to her anytime and every time I needed to.

I am thankful to Mr. P. K. Hazra, Head, Department of Computer Science, University of Delhi and former heads Dr. Vasudha Bhatnagar and Dr. Neelima Gupta, for continuous administrative support during their respective tenures. I also wish to thank the learned faculty members for their guidance and non teaching staff of the department for their kind
cooperation during the entire period of my study.

I earnestly wish to acknowledge Dr. Madhu Pruthi, Principal, Keshav Mahavidyalaya, University of Delhi, whose tenacious endeavors got me study leave to pursue my research work in the smoothest possible manner. Her encouraging words kept my spirits high and urged me to do better. I thank the teaching and non-teaching staff of college for their support. I also commend the cooperation of my students for being the subjects of the experimental studies conducted by me during my research work.

I acknowledge the efforts of the learned reviewers for appraising my research articles. Their insightful reflections have helped me immensely to improve upon the quality of my research work.

I extend my special thanks to Dr. Padmasai Arora, an ardent friend for being there in the time of need. She always upheld me in my moments of distress. She helped me out with intricacies of Statistics and steered me towards critical thinking. I also heartily thank my friends and fellow research scholars at the department. I shall always cherish the warmth that I felt while working with them in a cohesive group. Series of worthwhile discussions within the group proved instrumental in shaping the course of my research.

I am grateful to God, my parents and grandparents for bestowing me my identity and blessing me with a purposeful life. It was but for realizing the dream of my parents that I set out on this journey and have reached this far. I am indebted to my parents-in-law for providing me with a congenial environment at home and letting me concentrate on my research work. I feel overwhelmed while thanking my husband for his caring attitude and unconditional support. He valued my work and shouldered most of the familial responsibilities so that I could keep going with my work at utmost priority. I shall always be grateful to my loving kids Asmita and Arnav for understanding and respecting the sensitivity of my work.
