Acknowledgement

It gives me immense pleasure to extend my indebtedness to all those who provided immeasurable support for the completion of my work. First and foremost, I would like to express my deep gratitude to Dr. Hema Banati, my supervisor at the University of Delhi. She provided endless encouragement, support and guidance throughout my research work. She created an environment where it was a pleasure to work and conduct research. She provided the much needed brilliant ideas and motivation during the days I wondered about the direction of my work. Her guiding words have always inspired me to move ahead and pursue the path of excellence.

I owe my sincere and earnest thankfulness to my advisory committee members, Dr. Punam Bedi and Prof. Manohar Lal, for their valuable suggestions. My special thanks to them for their timely inputs that helped to improve my work.

I wish to express my sincere gratitude to Mr. P.K. Hazra, Head of the Department, Computer Science, University of Delhi and former heads of the Department, Dr. Vasudha Bhatnagar and Dr. Neelima Gupta for the logistic support whenever required by me.

I am sincerely grateful towards the COO, Dr. Y Medury and Vice Chancellor, Prof. S. C. Saxena and Prof. J.P. Gupta (Former) of Jaypee Institute of Information Technology (JIIT), Noida, for providing me study leave and helping me get through the difficult times. Without their support I might have been juggling between the university and institute.

Thanks also go to all the members of our research group whom I met during the time of this work, for the great discussions both on-topic and off-topic. I also wish to appreciate the help extended by the faculty, staff members of laboratory, office and library of the Department, Computer Science, University of Delhi for their untiring and unconditional support.
A penultimate thanks goes to my parents for believing in me and encouraging me to pursue my dreams by becoming a Doctor (Amen), even though not a medical one. I also wish to thank my brother and sisters for all the emotional support and camaraderie provided by them since my childhood.

My most heartfelt acknowledgement goes to my husband. His continuous support, patience, encouragement and companionship made my journey during this work, a pleasant experience. I owe a special thanks to the light of my eyes, my son Aayush for cheering up my dullest moments. Thanks for being the constant source of energy. I dedicate this thesis to my son Aayush.
