Acknowledgement

Completing my research and writing this thesis has been, in many ways, like a journey up Mount Everest; long, steep and dotted with many moments of discouragement. The view from the mountaintop leaves me dizzy with nostalgia, and I recount with a profound sense of gratitude, the several personalities on whose support I leaned during my journey.

With deepest gratitude and respect, I bow down at the holy feet of my God and my grand-father, whose incessant blessings alone have enabled me to reach this stage.

At the very upset, I express my deep sense of gratitude to Dr Swati Vyas, Senior Assistant Professor, Department of Home science, The IIS University, Jaipur for her bountiful kindness, uncanny eye for perfection and an untiring attitude towards work. Her patience and calm persona always helped me handle my anxiety and stress during crucial situations. I have learnt a lot from her not only in terms of knowledge, but she has inspired me to be a better human being.

I also wish to give deep felt thanks to Dr Ila Joshi, Head of Department, Department of home Science, The IIS University, Jaipur for her supervision, guidance and help. Her initial impetus, sustained nurturing, continuous encouragement and inspiration have been the motivating forces for this research work. It is also my great privilege to remember Dr Ashok Gupta, Director, The IIS University, Jaipur, a yeoman in the field of education besides being a great guiding beacon of light in life of many including mine. I would also like to give my heartfelt thanks to Dr Rakhi Gupta, Rector, Registrar, The IIS University, Jaipur for all her cooperation and motivation. I am highly thankful to Ms Isha Sukhwal for her extremely benevolent nature and ever helping attitude, for extending all the help that she could whenever asked for.

I thank my family who have been a rock of support for me every stage of my life. My father, Shri Shakti Singh Mehta, who gave me the love for books, for being a marvelous father, a friend and a mentor. He has contributed in more than words can ever express, in almost every way possible. He has been a source of inspiration and encouragement to me and I can never really express fully, all my indebtedness to him. My Mother, Smt Manju Mehta, for all her sacrifices, efforts, prayers and motivations. I could
do what I did only because my parents dreamt and wished this. I would also like to extend my thanks to my siblings, Pooja and Pankaj, for their cooperation and blessings.

I would also like to acknowledge the help rendered by my husband Mr Darpan Bhandari in completion of my work. His constant encouragement and moral support especially at the time of despair helped me in accomplishing this task successfully. I sincerely acknowledge my thanks to my father-in-law Shri Vimal Kumar Bhandari and Mother-in-law Smt Manju Bhandari who were always there to support me in my endeavours. Their silent prayers, love, affection and steel belief in my capabilities have enabled me to take up this research work.

My thanks go to all those too, who helped me and contributed in this work, even in the smallest ways, but their names could not be mentioned here.

Deepika Mehta
