ACKNOWLEDGEMENTS

First of all, I express my deep sense of gratitude to “The almighty God” for providing me this opportunity and strengthening me to complete it successfully.

This thesis is the result of years of work whereby I have been supported by many people. I am taking this opportunity to express my gratitude to all those who have significantly contributed for accomplishment of this study.

I would like to offer honest, heartfelt gratitude to Dr. Pratibha Desai, Director, Shree Ram Krishna Institute of Computer Education and Applied Sciences, Surat, whose encouragement, guidance and support from the initial to the final level enabled me to complete this marathon task. She has always given me freedom to explore new idea and approaches in research and also kept me on track by periodic vigilance on my work. Her valuable remark, insightful criticisms, and patient encouragement aided the writing of this thesis in innumerable ways.

I am also grateful to the management of Span Diagnostics Ltd. and my superiors for allowing me to carry out this study and supporting me in all possible ways till completion of this work. I express my utmost gratitude to Dr. P. K. Desai, who has inculcated research aptitude and advised to remain learner in all stage of life.

I am also thankful to the management of Institute of Medical Technology, Udhna, Surat for allowing me to use their facility to carry out my research work. I would like to thank all staff member of Institute of Medical Technology for rendering their help during my project work.

I express my profound thanks to Dr. Mehul Desai, Yash Clinical Laboratory, Surat for allowing me to work in their laboratory and use expensive infrastructure without hesitation. I am also very thankful to SRL Diagnostics and Patkar Laboratory, Mumbai for extending their support.
I am also very thankful to all staff members of the department of Microbiology, Shree Ramkrishna Institute of Computer Education and Applied Sciences, Surat for extending their help and cooperation.

I would like to acknowledge support of all my team members at Span Diagnostics Ltd, for extending their unconditional support by sparing their personal time and energy during this research work. I am very thankful to them for their support.

It is not possible to complete this work without moral support and encouragement of my family members. Their trust and inspiration have fueled my enthusiasm to accept such a big challenge, full of difficulties and sacrifices. I do not find words to express my gratitude to my parents Kaushikaben and Rajanbhai for their moral support, and motivation. They have made me what I am today; it is not possible to reach at this stage of accomplishment without their nurturing and endless guidance. I am also thankful for support and evident pride of my father in-law Rajendrabhai and mother in-law Bhanuben which has boosted my confidence. I am also thankful to my brother Chintan and sister in-law Twinkle for extending all available support in giving final shape to this thesis.

I am heartily thankful to my wife Jigna and my son Kathan, they have sacrificed their many vacations, plans, schedules and requirements in the journey to fulfill my dream. It was not possible to complete this work without Jigna, it was her determination which has kept my enthusiasm alive throughout this years.

I want to thank all my friends, relatives, colleagues and well wishers, for their love, support and sharing joys and troubles both during this project and everyday life.

Lastly, but not the least, I cannot forget to express my deep sense of thanks and gratitude to those who helped directly or indirectly in this work. I would like to show my appreciation to everyone who have assisted and supported me in any aspect during the completion of this thesis.

Pranav R. Naik
