	List of symbols and abbreviations	i
	List of Figures	vi
	List of Tables	ix
	Introduction	1
PART -I	Studies on Seroepidemiology, Comparative analysis of RICA and MAC-ELISA and Molecular Diagnosis of <i>Chikungunya virus</i>	
1	Introduction	5
	Objectives of the present study	8
2	Review of literature	9
	2.1: Virion Structure	9
	2.2: Genome organization	10
	2.3: CHIKV replication	11
	2.4: <i>Alphavirus</i> Proteins	12
	2.4.1: Non-structural proteins	12
	2.4.2: Structural proteins	14
	2.5: Origin and Geographical distribution of CHIKV	17
	2.6: Transmission	19
	2.7: Other modes of transmission	20
	2.8: CHIKV Outbreak – Current Scenario (2004 – 2011)	21
	2.9: Clinical manifestations and complications	25
	2.10: Laboratory diagnosis	27
	2.11: Therapeutics and vaccines	31
	2.12: Prevention and Control	32
	2.12.1: Protective measures against mosquito bites	32
	2.12.2: Control of mosquito breeding sites	33
	2.12.2.1: Mechanical destruction of mosquito breeding sites	33
	2.12.2.2: Larvicidal Control of Mosquitoes	33
	2.12.2.3: Surveillance	33
	2.12.2.4: Information, Education and Communication (IEC) Activities	34
3	Materials and Methods	35
	3.1: Chikungunya epidemic	35
	3.2: Surveillance and Seroepidemiology	35
	3.2.1: Survey	35
	3.2.2: Questionnaire preparation	35
	3.2.3. Clinical Symptoms	36
	3.3: Sample collection	36
	3.3.1: Sample analysis	36
	3.3.2: Rapid Immunochromatographic assay (RICA)	37
	3.3.3: IgM Capture Antibody – Enzyme Linked	38

	Immunosorbant Assay (MAC-ELISA)	
	3.3.4: Comparative sensitivity of RICA and MAC-ELISA	39
	3.4: Molecular diagnosis of Chikungunya	40
	3.4.1: Preparation of RNase-free materials	40
	3.4.2: Extraction of RNA from CHIKV infected patient sera	40
	3.4.3: Reverse Transcription or Complementary DNA (cDNA) synthesis	41
	3.4.4: Primer design	42
	3.4.5: Standardization of RT-PCR	43
	3.4.6: Confirmation of RT-PCR products in 1% Agarose Gel Electrophoresis	44
	3.4.7: Gel purification of PCR Product	45
	3.5: Cloning of E1 gene amplicon of CHIKV	46
	3.5.1: Ligation of the PCR products	46
	3.5.2: Preparation of Competent E.Coli cells	47
	3.5.3: Transformation	47
	3.5.4: Selection of Recombinant clones	48
	3.5.5: Isolation of plasmid DNA (Miniprep)	48
	3.5.6: Confirmation of recombinant clones by colony PCR	49
	3.5.7: Confirmation of recombinant clones by Restriction enzyme digestion	49
	3.5.8: Sequence analysis of E1 gene amplicon	50
4	Results & Discussion	52
	4.1: Surveillance	52
	4.2: Seroepidemiology	53
	4.3: Sample analysis	54
	4.4: Rapid Immuno Chromatographic Assay (RICA)	54
	4.5: IgM Antibody Capture – Enzyme Linked ImmunoSorbant Assay (MAC – ELISA)	56
	4.6: RICA Vs MAC-ELISA	58
	4.7: Extraction of CHIKV RNA	58
	4.8: Diagnostic RT – PCR	58
	4.9: Purification of PCR product	59
	4.10: Cloning of E1 gene amplicon into pGEM – T easy vector system	59
	4.11: Isolation of plasmid DNA and confirmation of the Presence of Insert	59
	4.12: Analysis of the generated sequence	60
	4.13: Phylogenetic analysis	60
5	Summary and Conclusion	66
	Annexure	68

PART-II	Studies on RT-PCR based Detection and Molecular Characterization of <i>Bluetongue virus</i> isolates from Andhra Pradesh	
1	Introduction	70
	Objectives of the present study	73
2	Review of literature	74
	2.1: Bluetongue: A Historical Perspective	74
	2.2: Geographical Distribution	75
	2.2.1: World	75
	2.2.2: India	75
	2.3: Bluetongue: The disease	76
	2.4: Clinical signs	77
	2.5: Post-Mortem Lesions	78
	2.6: Transmission	79
	2.7: Bluetongue Virus	80
	2.8: BTV Serogroups and Serotypes	81
	2.9: Bluetongue viral proteins	83
	2.9.1: Core polypeptides	84
	2.9.2: Non-structural proteins	85
	2.9.3: Outer capsid polypeptides	87
	2.10: BTV Genome	89
	2.11: S7 gene	91
	2.12: NS3 & NS3A	91
	2.13: Isolation of Bluetongue virus	92
	2.14: Propagation of bluetongue virus	93
	2.14.1: Animals	93
	2.14.2: Embryos	94
	2.14.3: Cell cultures	95
	2.15: Purification of Bluetongue virus	99
	2.16: Diagnosis	101
	2.16.1: Group-specific molecular assays	103
	2.16.2: Serotype-specific molecular assays	103
	2.17: Genomic relationships	104
	2.18: Extraction of Viral dsRNA	107
	2.19: Electrophoretic Migration of BTV dsRNA Segments	109
	2.20: Polymerase Chain Reaction	110
	2.21: Cloning	113
	2.22: Molecular characterization of bluetongue virus	114
	2.23: Genome segment-7	118
3	Materials and Methods	120
	3.1: Glassware and Plasticware	120
	3.1.1: Preparation of Glassware	120
	3.1.2: Cell Line	120
	3.1.3: Cell culture medium	120
	3.1.4: Tryptose phosphate broth (TPB)	121
	3.1.5: Serum	121

	3.1.6: Growth medium	121
	3.1.7: Maintenance medium	121
	3.1.8: Medium for Cryopreservation of cells	121
	3.1.9: Trypsin Versin Glucose solution	121
	3.1.10: Stains and Fixatives	122
	3.1.11: Reference Virus	122
	3.1.12: Clinical sample: Blood	122
	3.1.13: Tri reagent	122
	3.1.14: Diethyl pyrocarbonate (DEPC) treated water	122
	3.1.15: Plasticware for RNA work	123
	3.1.16: Chemicals	123
	3.1.17: Oligonucleotide primers	123
	3.1.18: Enzymes and other PCR requirements	124
	3.1.19: Molecular biology kits	124
	3.2: Sample collection	125
	3.3: Development of RT-PCR for the diagnosis of BTV	125
	3.3.1: RNA extraction from Blood samples	125
	3.3.2: Analysis of RNA profile of BTV	126
	3.3.2.1: Agarose Gel Electrophoresis	126
	3.3.2.2: Polyacrylamide Gel Electrophoresis	127
	3.3.3: Reverse transcription and polymerase chain reaction (RT-PCR)	127
	3.3.3.1: Reverse Transcription	128
	3.3.3.2: Polymerase Chain Reaction	129
	3.3.3.3: Confirmation of PCR Products in 1% Agarose Gel	130
	3.4: Propagation of BTV isolates in BHK21 cell line with reference to BTV/TPT (BTV-2)	130
	3.4.1: Propagation of BTV in bulk	131
	3.4.2: Titration of BTV isolates in BHK ₂₁ cell lines	131
	3.4.3: Plaque assay	132
	3.4.4: Cytopathic effect	132
	3.4.5: Staining of coverslip cultures: Hematoxylin and Eosin Method	133
	3.5: Purification of Bluetongue virus	133
	3.6: Molecular characterization of BTV isolates based on VP7 and NS3 genes	134
	3.6.1: Extraction of RNA from infected cell monolayers	134
	3.6.2: Reverse transcription and polymerase chain reaction of BTV S7 (VP7) gene	135
	3.6.2.1: Reverse Transcription	135
	3.6.2.2: Polymerase Chain Reaction	136
	3.6.3: Reverse transcription and polymerase chain reaction of BTV S10 (NS3) gene	137
	3.6.3.1: Reverse transcription	137
	3.6.3.2: Polymerase chain reaction (PCR)	138
	3.6.4: Confirmation of S7 and S10 gene amplicons in 1% Agarose Gel	139

	3.6.5: Gel purification of PCR Products	139
	3.6.6: Cloning of purified PCR products of S7 gene and S10 gene into PTZ57R/T vector	141
	3.6.7: Ligation of the PCR product	141
	3.6.8: Preparation of competent cells and Transformation	142
	3.6.9: Screening of Recombinant colonies for the presence of insert	143
	3.6.10: Colony – Polymerase chain reaction	143
	3.6.11: Extraction of plasmid DNA	143
	3.6.12: Plasmid-PCR	144
	3.7: Sequencing of Recombinant plasmids	144
	3.8: Analysis of generated sequences	145
4	Results & Discussion	148
	4.1: Sample Collection	148
	4.2: Extraction of BTV dsRNA	149
	4.3: Analysis of BTV ds RNA Profile	149
	4.3.1: 1% Agarose gel Electrophoresis of BTV dsRNA	149
	4.3.2: Polyacrylamide gel electrophoresis	150
	4.4: Quantification of BTV dsRNA	150
	4.5: Diagnostic RT-PCR	151
	4.6: Propagation of Bluetongue viruses in BHK-21 cell line	152
	4.6.1: Virus titration	152
	4.6.2: Staining of cells	153
	4.7: Purification of BTV isolates	153
	4.8: Molecular characterization of BTV	154
	4.8.1: Amplification of S7 gene:	154
	4.8.2: Amplification of S10 gene	155
	4.8.3: Purification of PCR products	155
	4.9: Cloning of gel purified products into pTZ57R/T vector system	155
	4.9.1: Isolation of plasmid DNA and confirmation of the Presence of Insert	156
	4.10: Sequencing of Positive Clones	156
	4.11: Analysis of Generated sequences	157
	4.11.1: Phylogenetic Analysis of S7 (VP7) gene sequence	157
	4.11.2: Phylogenetic Analysis of S10 (NS3) gene sequence	159
5	Summary and Conclusion	186
	References	189
	Appendix 1: Preparation of buffers and stock solutions	226
	Appendix 2: Nucleotide sequences of the present study	234
	Appendix 3: Publications and Conferences participated	238
