

## List of Tables

Table No.	Legend	Page No.
<b>Part -I</b>	<b>Studies on Seroepidemiology, Comparative analysis of RICA and MAC-ELISA and Molecular Diagnosis of <i>Chikungunya virus</i></b>	
Table 2.1:	Clinically suspected Chikungunya fever case since 2006	23
Table 2.2:	Atypical manifestations of Chikungunya infection	27
Table 2.3:	Diagnostic criteria for Chikungunya fever	30
Table 2.4:	Collection, Storage, Transportation of sample, isolation of the Virus and RT-PCR	30
Table 3.1:	The sequence and position of the diagnostic primers	42
Table 3.2:	Source of E1 gene sequences of <i>Chikungunya virus</i> isolates used in this study for comparison	51
Table 4.1:	Details of Sample collection areas	52
Table 4.2:	Symptoms of clinically diagnosed Chikungunya fever cases (n = 238) during the outbreak in kadapa district	55
Table 4.3:	Details of clinical samples processed in the study	56
Table 4.4:	Anti-Chik IgM detection using RICA and MAC-ELISA	57
Table 4.5:	RICA Vs MAC - ELISA	58
<b>Part-II</b>	<b>Studies on RT-PCR based Detection and Molecular Characterization of <i>Bluetongue virus</i> isolates from Andhra Pradesh</b>	
Table 2.1:	Prevalence of <i>Bluetongue virus</i> serotypes in India	82
Table 2.2:	Various <i>Bluetongue virus</i> serotypes reported in India	82
Table 2.3:	BTV Proteins and their functions	86
Table 3.1:	The sequence and position of BTV detection primers	123
Table 3.2:	The sequence and position of gene specific primers	124
Table 3.3:	Source of VP7 gene sequences of <i>BluetongueVirus</i> (Indian Isolates) used in this study for comparison	145
Table 3.4:	Source of VP7 gene sequences corresponding to all serotypes of <i>BluetongueVirus</i> used in this study for comparison	146
Table 3.5:	Source of NS3 gene sequences corresponding to all serotypes of <i>BluetongueVirus</i> used in this study for comparison	146
Table 3.6:	Source of NS3 sequences of all <i>BluetongueViruses</i> reported worldwide used in this study for comparison	147
Table 4.1:	Collection and detection of BTV in blood samples from BT suspected sheep	151
Table 4.2:	Spectroscopic Measurements of Extracted BTV Viral RNA samples	151
Table 4.3:	Infectivity titers of BTV isolates at different passages in BHK <sub>21</sub> cell lines	153
Table 4.4:	A <sub>260</sub> /A <sub>280</sub> ratio of the purified BTV isolates	154
Table 4.5:	Percent nucleotide sequence identity between VP7 gene of BTV isolates within India	167

Table 4.6:	Percent nucleotide sequence identity between VP7 gene of all the representative BTV serotypes from different geographical locations	168
Table 4.7:	Percent nucleotide sequence identity between NS3 gene of all the representative BTV serotypes from different geographical locations	169
Table 4.8:	Percent aminoacid sequence identity between VP7 gene of all the representative BTV serotypes from different geographical locations	170
Table 4.9:	Percent aminoacid sequence identity between VP7 gene of BTV isolates reported from India	171
Table 4.10:	Percent aminoacid sequence identity between NS3 gene of all the representative BTV serotypes	172
Table 4.11:	Percent aminoacid sequence identity between NS3 gene of all the BTV isolates from different geographical locations	173
