

## *Acknowledgement*

*On the recollection of so many and great flavours and Blessing, I now, with a high sense of gratitude, presume to offer up my sincere thanks to The Almighty, The Preservor and The Creator.*

*The completion of my dissertation and subsequent Ph.D. has been a long journey. It's true that "Life is what happens" when you are completing your dissertation. Life doesn't stand still, nor wait until you are finished and have time to manage it.*

*Pursuing a Ph.D. project is both a painful and enjoyable experience. It is just like climbing a high peak step by step, accompanied with bitterness, hardship, frustration, encouragement, trust and with so many people's kind help. When I found myself at the top enjoying the beautiful scenery, I realized that it was infact teamwork that got me there. I could not have succeeded without the invaluable support of several. Without these supporters, especially the select few I'm about to mention, I may not have gotten to where I am today, at least not sanely.*

*Men words can never encompass my profound gratitude and indebtness to my esteemed teacher, mentor and supervisor Prof. (Mrs.) Praveen P. Balgir, professor in Department of Biotechnology, Punjabi University, Patiala who accepted me as her Ph.D. students without any hesitation. Thereafter she offered me so much advice, patiently supervising me and always guiding in the right direction. I am also very grateful to madam for her scientific advice and knowledge and many insightful discussions and suggestions. She is my primary resource for getting my science questions answered and was instrumental in helping me crank out this thesis. I have learnt a lot of from her. She is someone you will instantly love and never forget once you meet her. The joy and enthusiasm she has for her research was contagious and motivational for me, even during tough times in the Ph.D. pursuit. I am also thankful for the excellent example she has provided as a successful woman scientist and professor. Without her help, I could not have finished my dissertation successfully.*

*The best and worst moments of my doctoral journey have been shared with many people. It has been a great privilege to spend five years in the Department of Biotechnology. Special thanks to all faculty members Dr. Munish Puri (Head, Department of Biotechnology), Dr. R.S. Singh, Dr. Aruna Bhatia, Dr. Neelam Verma, Dr. Baljinder Kaur, Dr. Minni Singh, Dr. Seema Garch, and Dr. Balwinder Singh Sooch for their encouragement, moral support and intense discussions in seminars.*

*I also extend my thanks to Mr. Maan, Mr. Gurdeep, Mr. Darshan Singh, Mr. Indersen, Mr. Mohaninder Singh, Mr. Karam Singh, Mr. Om Prakash, Mr. Dinesh, Mr. Sukhdev and Mr. Vijay for their timely co-operation. I take this opportunity to sincerely acknowledge Punjabi University, Patiala for providing financial assistance in the form of Research Fellowship which buttressed me to perform my work comfortably.*

*I am also thankful to Prof. Lindstay Eltis, Life science Institute, Canada for providing the Rhodococcus strain. My sincere thanks are to Dr. Hor Gil-Hur, Institute of Science and Technology, Gwangju, Korea for gifting Pseudomonas nitroreducens Jin1 culture and Dr. Venkat Gopalan for gifting me vector Bluescript.*

*I would like to give special thanks to Dr R. K. Goel, faculty member of Deptt. of Pharmacy, Avnish and Tanvir for conducting some experiments in their lab.*

*The members of the Genetic Engineering lab have contributed immensely to my personal and professional time. The group has been a source of friendships as well as good advice and collaboration for me. I have the pleasure to work with or alongside them. I will always remember Nipun, Balvir Sir, Deepak, Tejinder, Puneet, Jaspreet, Deb, Rajinder madam, Navneet, Gagan, Mallika, Neena whose company I always enjoyed. I was lucky to have the best possible labmates. Despite the work, we could always find time for a good laugh and curious conversations. I am also thankful to them for their timely encouragement, moral support and co-operation.*

*Of course no acknowledgments would be complete without giving thanks to my parents. Both have instilled many admirable qualities in me and given me a good foundation with which to meet life. They've taught me about hard work and self-respect, about persistence and about how to be independent. Both have always expressed how proud they are of me and how much they love me. I too am proud of them and love them very much. I am grateful for them both and for the 'smart genes' they passed on to me.*

*It's my fortune to gratefully acknowledge the support of some special individuals. Words fail me to express my appreciation to my sister Punam for her support, generous care. She was always beside me during the happy and hard moments to push me and motivate me. My sister has been my best friend all my life and I love her dearly and thank her for all her advice and support. I know I always have my family to count on when times are rough. Her husband Dr. Rajinder Manchanda always appreciated me. A journey is easier when you travel together.*

*In addition, these acknowledgements would not be complete if I did not mention my daughter Sudivya and son Harshit. They have been a twinkle in my eye since they were born. They never forget to celebrate precious day of my life. Throughout my doctoral program, they have been a bright light, often supportive me for my research always concerned with how stressed I might be. Their weeklong summer visits the last few years have been invaluable. They have re-energized and given me a much-needed reprieve from work and school, not to mention imprinted infinite wonderful memories on my heart. Thank you, I love you very much.*

*I would like to pay high regards to my brother Yogesh and his wife, Reeta for their sincere encouragement and inspiration throughout my research work and lifting me uphill this phase of life. During the inevitable ups and downs of conducting my research, he often reminded me life's true priorities, gave me moral support and suggested me forgot all other things, complete your doctoral programme. This helped me a lot to work for hours together tirelessly. And really with his support, I could complete it. I am thankful to my brothers Mukesh and Rakesh and his wife, Anita who are always on my side in difficulties. Besides this, several people have knowingly and unknowingly helped me in the successful completion of this project.*

*I am specially thankful to Abhishek and Raghav for assisting me in editing, proof reading and printing Thesis.*

*Last, but certainly not least, I must acknowledge with tremendous and deep thanks to my partner, Lalit. His love and encouragement allowed me to finish this journey. I will give him a heartfelt "thanks." I am also thankful to my mother in law, Sarla Devi, Brother in law Dr. Mukesh Thakkar, His Wife Dr. Shivani Thakkar and Satyapal Thakkar for the affection and support given by them. Thanks to my family for their endless patience and encouragement when it was most required. I owe my existence and survival to them.*

*Although I have made an effort to name all but if your name is not listed, rest assured that my gratitude is not less than for those listed above. At the end of my thesis, it is a pleasant task to express my thanks to all those who contributed in many ways to the success of this study and made it an unforgettable experience for me.*

*Dinesh Kalra*
