ACKNOWLEDGMENTS

Working on the Ph.D. has been a wonderful and often overwhelming experience. It is hard to say whether it has been grappling with the topic itself which has been the real learning experience, or grappling with how to write papers and proposals, give talks, work in a group, stay up until the birds start singing, and stay focus. In any case, I am indebted to many people for making the time working on my Ph.D. an unforgettable experience.

I am deeply grateful to the honorable Chancellor Dr. S.J Chopra and Vice chancellor Dr. Parag Diwan, Dr. Shri Hari Campus Director, Dr. Kamal Bansal, Director, College of Engineering, to permit me research work in the R & D house in VLSI Design, UPES Dehradun. To work with my guide Dr. Piyush Kuchhal, Associate Professor, CoES, UPES and Dr. Sonal Singhal, Assistant Professor, Shiv Nadar University, NCR, India, has been a real pleasure to me, with heaps of fun and excitement. They have been a steady influence throughout my Ph.D. career that have oriented and supported me with promptness and care, and have always been patient and encouraging in times of new ideas and difficulties.

In addition, I have been very privileged to get to know and to collaborate with many other great people who became friends over the last several years. I learned a lot from them about life, research, how to tackle new problems and how to develop techniques to solve them. From the very beginning of my Ph.D. career, my guides supported me. Thank you for the fun and the encouraging discussions while meeting with you at the University of Petroleum & Energy Studies, Dehradun India.

ADESH KUMAR
