

CONTENTS

	Page no
Chapter-1 Introduction.....	1-27
1.1 Introduction.....	1
1.2 Basic concepts.....	2
1.3 Prandtl boundary layer theory.....	8
1.4 Stretching sheet problem involving Newtonian fluids.....	15
1.5 Stretching sheet problem involving non-Newtonian fluids.....	19
1.6 Magnetohydrodynamic flow over a stretching sheet.....	21
1.7 Thin liquid film flow over a stretching sheet.....	25
Chapter-2 Basic equations and Boundary conditions.....	28-56
2.1 Introduction.....	28
2.2 Basic Equations.....	28
2.3 Boundary layer equations.....	34
2.4 Boundary conditions.....	40
2.5 Dimensionless parameters.....	41
2.6 Numerical methods.....	45
2.7 Nomenclature.....	53
Chapter-3 Similarity solutions for heat transfer in an Ostwald-de Waele fluid flow past a non-linearly stretching surface.....	57-70
3.1 Introduction.....	57
3.2 Mathematical Formulation.....	59
3.3 Numerical procedure.....	62
3.4 Results and Discussion.....	63
3.5 Conclusion.....	66
Chapter-4 MHD flow and heat transfer of an Ostwald-de Waele fluid over an unsteady stretching surface.....	71-89
4.1 Introduction.....	71
4.2 Mathematical Formulation.....	73

4.3	Numerical procedure.....	78
4.4	Results and Discussion.....	79
4.5	Conclusion.....	82
Chapter-5	Combined buoyancy effects on the flow heat transfer of an Ostwald-de Waele fluid over a vertical stretching wall in presence of a chemical reaction.....	90-106
5.1	Introduction.....	90
5.2	Mathematical Formulation.....	93
5.3	Numerical procedure.....	97
5.4	Results and Discussion.....	98
5.5	Conclusion.....	101
Chapter-6	Momentum and heat transfer of a non-Newtonian Eyring-Powell fluid over a non-isothermal stretching sheet.....	107-126
6.1	Introduction.....	107
6.2	Mathematical Formulation.....	110
6.3	Numerical procedure.....	115
6.4	Results and Discussion.....	116
6.5	Conclusion.....	119
Chapter-7	MHD flow and heat transfer in a Power-law liquid film at a porous surface in the presence of thermal radiation.....	127-144
7.1	Introduction.....	127
7.2	Mathematical Formulation.....	130
7.3	Numerical procedure.....	135
7.4	Results and Discussion.....	136
7.5	Conclusion.....	139
Chapter-8	Effects of variable fluid properties on thin film flow of an Ostwald-de Waele fluid over a stretching surface.....	145-162
8.1	Introduction.....	145
8.2	Mathematical Formulation.....	147
8.3	Numerical procedure.....	153

8.4	Results and Discussion.....	154
8.5	Conclusion.....	157
Chapter-9	Heat transfer of a non-Newtonian nanofluid thin film flow past a stretching surface.....	163-181
9.1	Introduction.....	163
9.2	Mathematical Formulation.....	166
9.3	Numerical procedure.....	171
9.4	Results and Discussion.....	172
9.5	Conclusion.....	176
	Conclusion.....	182-185
	References.....	186-202
