ACKNOWLEDGEMENT

First and foremost, I wish to pay my most humble obeisance to the almighty God for giving me the inspiration and wisdom to take up this task. I have been his guiding hand that has brought this task to a successful completion.

I feel great pleasure in expressing my deep and sincere gratitude to my research supervisor Dr. Paresh S. Patel, Associate Professor, Department of Chemistry, Narmada College of Science and Commerce, Zadeshwar, Bharuch for his perceptive guidance, invaluable suggestions and keen criticism while carrying out the research work. I appreciate his vast knowledge and skill in many areas and his assistance which have on occasion made me "GREEN" with envy, enduring passion, moral support and help out of the way led me to overcome all the difficulties I encountered during this endeavor. He showed me different ways to approach the research problems and the need to be persistent to accomplish goal. I attribute the level of my research work to his encouragement and effort and without him this thesis too, would not have been completed or written. One simply could not wish for a better or more knowledgeable supervisor.

It gives me great pleasure to express my heartfelt gratitude to my research co-guide Dr. K. C. Patel, Professor and Head Department of Chemistry, Veer Narmad South Gujarat University, Surat whose diligent guidance and whole heartedly encouraged at every stage in my research work. His enduring passion, moral support and help out of the way led me to overcome all the difficulties. I encountered during this endeavor. I am certain that the guidance and training provided by him has laid a foundation for future success.

I am grateful to Dr. B. M. Rawal, Principal, Narmada College of Science and Commerce, Zadeshwar, Bharuch for providing necessary facilities.

I am thankful to Dr. D. M. Vashi, Head, Department of Chemistry, Narmada College of Science and Commerce, Zadeshwar, Bharuch for providing me valuable support in smooth access to the well equipped laboratory research facilities and library facilities of Department of Chemistry. I thank the teaching and administratative staff of the Department of Chemistry for their kind co-operation,
valuable instructions and suggestions throughout research activity.

I am also thankful Dr. Himanshu, Dr. Divyeshbhai, Vijaybhai, Vivek, Mayank, Mohsin, Divyanshu and Dharmishtra for their valuable support.

I am also thankful to SAIF, Punjab University, Chandigarh for providing the for Proton Magnetic Resonance spectral analysis and elemental analysis facilities. I am thankful to the Chemistry Department, Saurashtra University, Rajkot for IR spectra facilities and Atul Limited for providing chemicals, dyeing and library facilities.

I am also thankful to my brother Dixit and brother in law Bharatbhai for preparing thesis separator. I am thank to my sister Bhavana, Bhumika and sister in law Bigisha and my niece Heyan for their moral support of entire study. I am also thankful to Jagdish Chapaneri for his support.

I am also thankful to my aunty Damyantiben, Parvatiben, Ramilaben Saraswatiben, Gangaben and uncle Thakorbhai for providing me moral support during my research work.

Who in this world can entirely and adequately thank the parents who have given us everything that we possess in this life. During my research work there was continuous support from my family. It was their kindness and patience that they allowed my absence from my family duties. I have no words to express my gratitude for the unconditional love, support, inspiration and blessing given by my father

**Shri Kantibhai I. Patel**, my loving mother **Smt. Rekhaben K. Patel** and my father in law (Late) **Khandubhai B. Patel** and my loving mother in law **Sitaben K. Patel**.

And last but not the least me heartfelt thanks to my husband **Sandip** for supporting and encouraging me to pursue this degree. Without my husband’s encouragement, I would not have finished the work.

(PRATIXA K. PATEL)
