# CONTENTS

## Chapter-I

An overview of Heterocyclic Compounds and their Biological Significance

**Part A**
- Introduction 1-18
- References 19-24

## Chapter-II

Synthesis, Characterization of 4(2-(2-Oxoindoline)aminocyclopent-1-enecarbothiol)Thio Derivatives and Evaluation of their Antimicrobial Activities

**Part A** Introduction 25-34
**Part B** Present Work
- Synthesis and characterization of Oxoindoline derivatives from 2-amino cyclopent-1-ene carbodithioic acid 35-52
- **Part C** : Bioevaluation of Oxoindoline derivatives with 2-amino cyclopent-1-ene carbodithioic acid 53-66
- References 67-70

## Chapter-III

Synthesis and characterization of 5,6 substituted, 2,3 diaryl, quinoxaline 1,4-di-N-oxide derivatives and 7-substituted-2,3-diphenylpyrido[3,2-b]pyrazine derivatives and investigations of their anticancer activity beside microbial activity.

**Part-A** Introduction 71-88
Part-B: Present Work

Section-A: Synthesis and Characterization of 5,6 substituted, 2,3 diaryl, Quinoxaline 1,4-di-N-Oxide Derivatives

Section-B: Synthesis of 2,3-diphenylpyrido [3,2-b]pyrazine (VIIa), 7-bromo-2,3-diphenyl pyrido[3,2-b] pyrazine (VIIb) and their 1,4-N-dioxides (VIIIa-VIIIb).

Part-C: Anticancer activities of synthesized Quinoxaline 1,4-di-N-Oxides

Part-D Antimicrobial activity of synthesized Quinoxaline 1,4-di-N-Oxides

References

Chapter-IV

Synthesis, Characterization and Bioevaluation Of 3-Substituted Phenyl-5-(2”,2”-Dimethyl,7”-Hydroxychroman) Isoxazole and 3-(4’-Chloro Phenyl)-5-(3”,4”,9”,10”-Tetrahydro-2”,2”,8”,8”-Tetra Methyl-2”H,8”H-Dipyrranylb enzo[1,2-B:3,4-B’]) Isoxazole Besides Molecular Docking Studies

Part-A Introduction

Part- B Present Work

Section-A: Synthesis and Characterization of 3-substituted phenyl-5-(2”,2”-dimethyl,7”-
hydroxycromanolisoaxazole

Section-B: Synthesis and characterization of New chromanoisoxazoles: 3-(4’-chlorophenyl) -5-(3”",4”",9”",10""-tetrahydro-2"",2"",8"",8""-teta methyl-2"H,8"H-dipyranylbenzo [1,2-b:3,4-b’]) isoaxazole.

Part-C Biological activity studies of newly synthesized chromano isoaxazole Derivatives 197-206

Part-D Molecular Docking Studies newly synthesized chromano isoaxazole Derivatives 207-213

Results 214-224

References 225-230

CHAPTER-V

Synthesis, Characterization Of 5-((3-(4-Substituted Phenyl)-5-Mercapto-4H-1,2,4-Triazol-4-yl)Diazenyl)naphthalene-2-ol Derivatives and Study of Their Anti-Inflammatory Activity

Besides Microbial Activity

Part-A: Introduction 231-241

Part-B Present Work 242-279

Synthesis, Characterization of 5-((3-(4-substitutedphenyl)-5-mercapto-4H-1,2,4-triazol-4-yl)diazenyl)naphthalene-2-ol derivatives.

Part-C Anti-inflammatory activity of the synthesized compounds VIa-VIe 280-289

Part-D Antimicrobial activities of 290-301
synthesized compounds VIa-VIe

References 302-308

Summary 309-321
