ACKNOWLEDGEMENTS

I express my gratitude to all those who have made this study possible. Foremost is my sincere appreciation to Professor D.V. Vadehra, Director, Regional Sophisticated Instrumentation Centre, Panjab University, Chandigarh, one of my guide who with his keen insight and intellectual inspiration belended with a touch of personal affection, kept things moving inspite of numerous problem in and out side the laboratory. I am indeed very thankful to him for his guidance throughout the work. I am also highly obliged to Dr. J.K. Gupta, Reader, Department of Microbiology, Panjab University, Chandigarh, my second supervisor for his keen interest and help in this study.

I am also indebted to University Grants Commission and Panjab University, for having provided fellowships, necessary funds and facilities to carry out this study.

I also gratefully acknowledge the constant encouragement given by my parents.

Finally, a tribute to my beloved wife for having borne with me patiently during the later part of this study.

Last but not least I express my thanks to Mr. Tek Chand Shalla, S.R.F, Department of Microbiology, Panjab University and Y.V. Sardana for typing and compilation of this thesis.

(Virendra Kumar Singh)
