Abstracts and Awards

1. Abstract entitled “Decline in Immunosuppressive Transitional B cells along with enhanced memory response following Vaccination in HBV infected Newborns are beneficial” **accepted for poster presentation in American association of Liver Disease 2011 to be held at San Francisco, California (AASLD 2011).**
2. Abstract entitled “Decline in Immunosuppressive Transitional B cells along with enhanced memory response following Vaccination in HBV infected Newborns are beneficial” accepted for **Oral presentation in 2nd International Conference of Immunological Tolerance 2011** to be held at Amsterdam, The Netherland.
3. Awarded with ICMR international travel award for **Oral presentation in the 2nd International Conference of Immunological Tolerance 2011** to be held at Amsterdam, The Netherland.
4. Abstract entitled “Hepatitis B Virus (HBV) mediated down regulated expression of CD3 ζ (T cell receptor signaling molecule) is associated with phenotypic and functionally defective T cells in HBV infected newborns” **accepted for Oral presentation at American association of Liver Disease 2010 at Boston (AASLD 2010).**
5. Awarded with CSIR international travel award for **oral presentation in the American association of Liver Disease 2010 at Boston (AASLD 2010).**
6. Awarded with **ICMR Senior Research Fellowship for two years** for the completion of Ph.D. (from 2010 onwards).
7. **Achieved Travel Grant award and also Best Poster award** for abstract entitled “Impaired Chemokine receptor but not T regulatory cell expression is partially restored after

vaccination in newborns to HBV positive mothers” which was accepted for poster presentation at **World Congress of Gastroenterology 2009, London.**

8. Abstract entitled “Immunological marker profiling for T cell activation, T regulatory cells, Toll like receptors and Chemokine receptor expression in neonates born to mothers positive and negative for HBV infection” **accepted for oral presentation in INASL 2009 and achieved best paper award**
9. Abstract accepted for the poster presentation entitled “Immunological marker profiling for T cell activation, T regulatory cells, Toll like receptors and Chemokine receptor expression in neonates born to mothers positive and negative for HBV infection” in APASL 2009 at Hongkong.
10. Awarded with Liver Care Foundation fellowship to present poster entitled “Immunological marker profiling for T cell activation, T regulatory cells, Toll like receptors and Chemokine receptor expression in neonates born to mothers positive and negative for HBV infection” at APASL 2009, Hongkong.
11. Abstract entitled “Impaired Chemokine receptor but not T regulatory cell expression is partially restored after vaccination in newborns to HBV positive mothers” accepted for poster presentation at American association of Liver Disease 2009 held at Boston (AASLD 2009).
12. Paper entitled “Impaired Chemokine receptor but not T regulatory cell expression is partially restored after vaccination in newborns to HBV positive mothers” **selected for oral presentation in Indian Society of Gastroenterology 2009 (ISG).**
