ACKNOWLEDGEMENTS

At the very onset, I would like to express my sincere regards and gratitude to my parents for their guidance, love and showing their immense faith in me to be independent, which is a source of unparallel inspiration for me.

This thesis is a journey of five years work, during which I came across many wonderful people who accompanied and supported me. It is quite a satisfying experience for me to be able to express my heartfelt gratitude to all of them

The most important person I would like to express my deep sense of gratitude is my supervisor **Prof. Talat Ahmad**. I consider myself fortunate at having got the opportunity to work under his able guidance, enthusiastic approach, disciplinary environment, constant support and confidence that he has shown in me. His mission of not just striving for high quality research but also to bring out the best person in his students has left a deep impression on my mind. Over the years, I have realized that behind a strong willed, highly principled person is a very kind human being who has taught me the virtues of forgiveness, tolerance and trust. I owe him lots of gratitude for showing me the way of research and life, making this journey not only professionally fulfilling but of personal growth as well.

I thankfully acknowledge Head of the Geology Department, University of Delhi, **Prof. C. S. Dubey** for providing me infrastructure and necessary facilities.

A sincere thanks to Dr. N.C. Pant and Prof. Jayananda Department of Geology, University of Delhi for their valuable suggestion and support for completion of my thesis.

I am thankful to **Prof. A. K. Choudhary**, Institute Instrumentation Centre, IIT Roorkee for providing necessary analytical facilities for generation of ICP-MS data.

I wish to express my special thanks to my colleagues, **Mukesh Kumar Mishra, Meraj Alam, Jwellys Samom, Kumar Batuk Joshi, Bhupendra S Yadav, Deepak Joshi, Md. Naushad Gargi Rai and Joyeeta Bhattacharjee** for their valuable suggestions and assisting me in all the lab work.
Special thanks to my seniors Nishchal Wanjari, Rajesh Y. Singh, Shyamkumar and Rakhi Verma for their unvarying encouragement and support.

I am extremely thankful to Dr. Meenakshi Sharma and Dina Yumnam Ningreichon for helping me in each step of this journey. They have always stood beside me whenever I needed help and support.

There are really no words to express my gratitude and love for my friends from whom I have learnt, lived and laughed at not only the hardships of work but life in general.

The financial support provided by CSIR in the form of Senior Research Fellowships is also greatly acknowledged.

I am forever grateful to my family for their love, care and support which they showered endlessly on me.

Above all, I owe everything to the Lord who has been my guardian throughout.

Longjam Kabita Chanu
