SOURCE : Price lists and Leaflets printed by the Units.

NOTE : An attempt has been made to prepare a comprehensive list. However, the model numbers and names are often changed. As a result the list is not absolutely complete. There are several instances where only a cosmetic change has been made and given a new model number. Various models of B/W TV receivers, both 36 cms and 51 cms, have essentially the same circuit and only the cabinet, decorations and hardware are different.
