ACKNOWLEDGEMENT.

I hereby express my heart-felt appreciation and gratitude to Dr. C. S. Raghunatha Rao, B.Sc., M.B.B.S., D.Phil.(Oxon.), Professor of Pharmacology, Medical College, Mysore, whose inspiring guidance, constructive criticism and outstretched helping hand all the time, have been of inestimable value and most gratifying in my endeavour.

I also express my thankfulness for the assistance I have received from time to time by my colleagues of Pharmacology Department.

I offer my thanks to Dr. M. Krishna Bhargava, M.D., Assistant Professor of Pathology, now in charge Professor of Pathology, who has been of invaluable help in the toxicity studies.

My thanks to Dr. K. G. Das., M.D., M.R.C.P., Professor of Medicine and his colleagues as well as his technician Sri. Gopalakrishna, for their help given in studying the F.C.G., of dogs. I also offer my thanks to Sri. K. C. Jayaram Reddy, Lecturer in Botany, for his help in Pharmacognostic study.
I am grateful to Sri Laxminarayanaiah, M.Sc., Head of the Department of Biochemistry and his colleagues for the suggestions in elaborating the chemical part of my work.

I have great pleasure in acknowledging the assistance I received from Sri S. M. Abraham for his expert photography.

I would be failing in my duty if I do not place on record my appreciation of the services of Sri M.3. Nagappa for excellent typewriting.

Lastly, I am thankful to the members of the junior staff of the Laboratory and Typist of Pharmacology Department for the keen interest in my experimental work, without all of whom the thesis would not have seen the light of the day.
